

Alternative Format Ballot Usage Guide

1. **Best URL to access a ballot:** www.oregonvotes.gov/myballot
(Goes directly to the registration login page)
2. **Supported Browsers & Screen Reader Parings:**

Voters marking their ballot with a screen reader should use:

JAWS with Edge, IE 11, Firefox (Win10 v1903 and above).

Narrator with Edge, IE 11 (Win10 v1903 and above).

NVDA with Edge, IE 11, Firefox (Win10 v1903 and above).

VoiceOver for iPad Safari (iOS 10 and above).

VoiceOver for Mac Safari (OSX 10.x and above).

(Type “winver” into Windows search box to get version #.

If Win10 is less than v1903, use IE 11 and not Edge.)

Note: If the Surface/PC OS has been updated in the last six months, it will be at v1903 or above. So, both Edge & IE 11 are supported.

3. **Windows Edge Browser now supported – Win10 v1903 and above**

- a. It's OK to use Edge if the icon for Narrator looks like this:

Edge

Narrator (v1903 and above)

- b. If Win10 is not v1903 or above, use IE 11 with the Narrator icon below.

IE 11

Narrator (Prior to v1903)

4. **Screen reader voters:** Use the **TAB** key to navigate, **space bar** to make choices and clear any error messages.
